## COMPANY PROFILE

Jiangsu Yunrui Electric Co., Ltd funded in 2013, gathering research, design, manufacture, sale and service for Auto wiper system, subsidiary of Jiangsu Yunyi Electric Co., Ltd ( Stock Code: 300304). Yunrui located in Jiangsu Xuzhou, register capital is 150 million RMB. Company has more than 230 employees including about 100 technician and management, facility size around 122,000 m<sup>2</sup>. Wiper capacity over 80 million each year.

Yunrui team has over 30 years of rich management experience in the automotive wiper industry, with over 80 R&D personnel, including 15 with doctoral degrees and more than 20 with graduate degrees. They have the ability to independently develop, design and verify. The company applies advanced rubber forming and cutting technology, has professional automated paint baking lines and stamping equipment, and has a complete quality control system, including APQP development process, ERP/PDM management system, and first in & first out traceability management system. Yunrui has set up a global R&D center, integrating internationally advanced experts in dynamics, fluid mechanics and materials science, and has independently developed a glass surface analysis system and wiper simulation system, which can quickly meet customers' wiper development needs.

Yunrui has always been committed to the vertical integration of the supply chain. Currently, all core rubber strips researched, developed, and produced independently. It is the only wiper rubber strip developed in China that has qualified by OE customers and been installed in batches in new vehicles. Currently, over 15 million pieces each year was been supplied to OE customers, effectively solving the common problems of abnormal noise, uncleanness, and non-durable, and has been widely recognized by major car manufacturers.

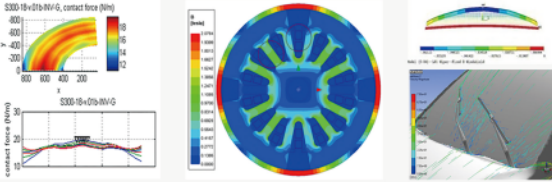

Since its establishment, the company has always positioned its wiper products in the mid to high end passenger vehicle, mainly supply for domestic and foreign new vehicle manufacturer, and European and American after-sales markets as the auxiliary. The company has always adhered to the principle of quality as the life of business management, with quality management as the concept, zero quality defects as the goal, refinement of management as the criterion, and lean production as the means, and has established a complete quality management and quality control system. At present, the company has reached cooperation with over 21 well-known car companies, including BYD, Volkswagen Group, SAIC Group, Chery Automobile, Changan Automobile, BAIC Group, Ideal, GAC, JAC, and more than 100 models. Customers have unanimously recognized the product quality.

## R&D-CORE COMPETENCE

### INDEPENDENT R&D

Critical process all designed and produced by ourselves including principles and simulations.

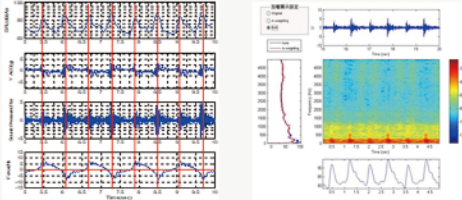

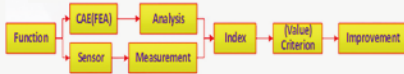

### VERTICAL INTEGRATION

We have injection molding, PCBA, stamping, die-casting, rubber forming, assembly and other integrated production chain, to provide customers with the best cost-effective solutions.

### NVH DEVELOPMENT

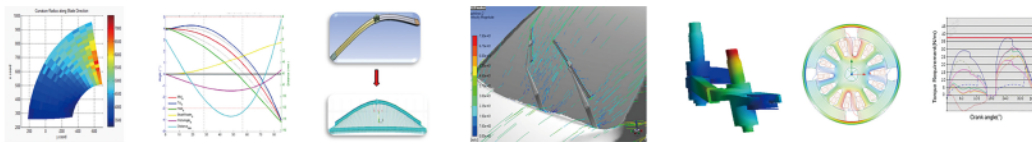

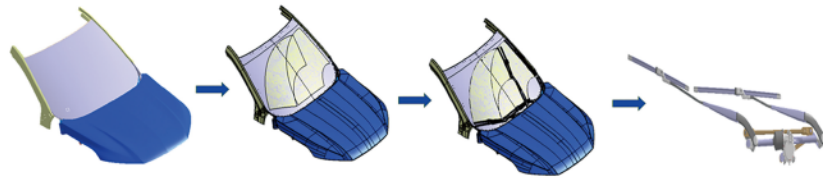

### TOTAL QUALITY MANAGEMENT

External 3rd quality certified and 2nd test lab certified.

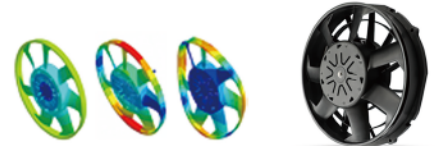

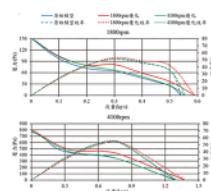

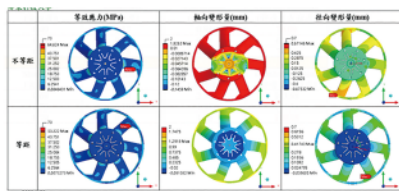

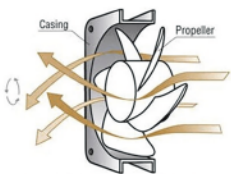

- IATF16949
- ISO14001:2015
- ISO45001:2018
- Formel Q
- VDA6.3

## WIPER SYSTEM TECHNOLOGY

## COOLING FAN TECHNOLOGY

## WIPER SYSTEM

Jet type wiper

Aero type wiper

Rear wiper

Frame type wiper

Hybrid type wiper

-  · Long lifetime, ultra quiet and self formulated rubber material and coating
-  · Independently development software

-  · NVH solution for wiper system
-  · Independent electronic motor control algorithm

## COOLING FANS

-  HIGH PERFORMANCE, MORE EFFICIENT, LOWER NOISE
-  EMC COMPLIANCE VERSION AVAILABLE
-  VARIOUS MOUNTING BRACKETS FOR OPTION\

-  GREATER AIR VOLUM, LONGER LIFETIME
-  IP69 PROTECTION, ROHS COMPLIANT
-  CUSTOMIZATION AVAILABLE FOR SPECIAL PERFORMANCE AND SPECIFICATIONS

# WB-66 SERIES INTELLIGENT WIPER

### YRJ-2 PATENTED WIPER RUBBER STRIP FORMULA

Exclusive patented formula, imported from Germany with liquid spray coating, easy to handle various extreme climates, making the product more durable

### OE FLAT DESIGN

Perfectly matched with the glass arc, the design is simple and smooth, with less visual interference to the driver, making it safer

### AERODYNAMIC FLUID DESIGN

Effectively controlling air flow, making the wiper blade fit more tightly and achieving better wiping effect

### OE QUALITY

same wiper rubber strips that been qualified by OE customers

### GERMAN NANO LIQUID SPRAYING PROCESS

with super strong ozone resistance and aging performance, with a longer lifespan

### INTELLIGENT WIPER

Innovative 12 in 1 intelligent wiper, matched with over 95% of vehicle models

### IMPORTED HIGH MEMORY BULLET MATERIAL

European imported high memory bullet material

### CONVENIENT INSTALLATION

**3D AIRFLOW CONTROL TECHNOLOGY**  
Excellent wiping performance

**YRJ-2 PATENTED WIPER RUBBER STRIP FORMULA**  
handling in various environments and weather conditions

**WIPER RUBBER STRIP QUALIFIED BY OE CUSTOMERS**  
Quiet, clean, and comfortable
